

## Alland Group's mission is to offer its customers the highest quality electrical services.

### Introduction

Established in 2011, Alland Group Pty Ltd is an Australian owned company, with years of experience in the electrical industry. We are a highly professional and dynamic business with a proven track record of effectively delivering diverse projects to a broad range of customers. We specialise in project management, innovative electrical communication and data solutions, installation and maintenance.

### Our Business

Alland Group is an industry leader and provides our customers with the highest quality electrical, data and telecommunications services. We pride ourselves in working with Top Tier Companies and maintaining

lasting relationships with our clients by exceeding their expectations and maintaining their trust through exceptional management and performance from all members of the team.

### Our Purpose

Alland Group prides itself on ability and a proven track record to provide our clients with successful completions on time and within budgets. Our values are safety, respect, performance, sustainability and accountability. We are genuinely client focused and continually seeking improvements in our products and practices. Our determination to succeed enables us to draw inspiration from challenges in order to provide our clients a timely, cost effective service without compromising on quality.

- Design and construction turn-key solutions
- Service and maintenance to new and existing buildings
- Thermographic Scanning
- Data and communications solutions
- Sustainable Lighting Solutions/LED upgrades
- Smart metering solutions
- Emergency & Exit Lighting Testing for Fire Safety Compliance
- Compulsory RCD Testing and Test and Tagging
- Specialist Lighting Control
- Comprehensive Switchboard Maintenance
- Lightning Protection
- PFC Servicing
- Commercial/Office refurbishment

## Quality Assurance

We will never compromise quality for price. Our quality assurance guarantee ensures our clients get the best product for their specifications. Our client services team are all highly qualified licenced electricians and our service vehicles are fully equipped with materials to meet the needs of most day to day work.

## Design and Construction Turn-key Solutions

Alland Group's experience enables conception of pre-design works in addition to design and construct projects. Our extensive experience covers all types of electrical and communications services in diverse projects.

## Wide-ranging Service & Maintenance Capabilities

Our Service team consult extensively with Building Managers to determine maintenance requirements. Current testing equipment and state of the art software enables our technicians to provide clients with mandatory testing as well as annual fire and tagging certification.

## Specialist Lighting Control (CBUS & Dynalite)

Alland Group is accomplished in the installation and programming of Specialist Lighting control systems. If you're thinking of turning your building into a smart building a Lighting Control system may be just what you need.

Specialist Lighting Control is a management system for Buildings, Hotels and Commercial venues. It is used to control lighting and other electrical services such as Pumps, Audio Visual Devices, Motors, etc. These systems can be used to easily control virtually any type of electrical load.

## Sustainable Lighting Solutions

Alland Group recognises the need to operate the business in a manner that reflects good environmental management. Modern sustainable products together with a focus on improved environmental outcomes can reduce not only the business running costs, but the impact of day to day business operations. We can also assist with procuring available rebates and incentives.

## Data and Communications Solutions

Alland Group's highly skilled workforce of data and communications experts can provide you with a futureproof cabling system to meet your data communications system requirements.

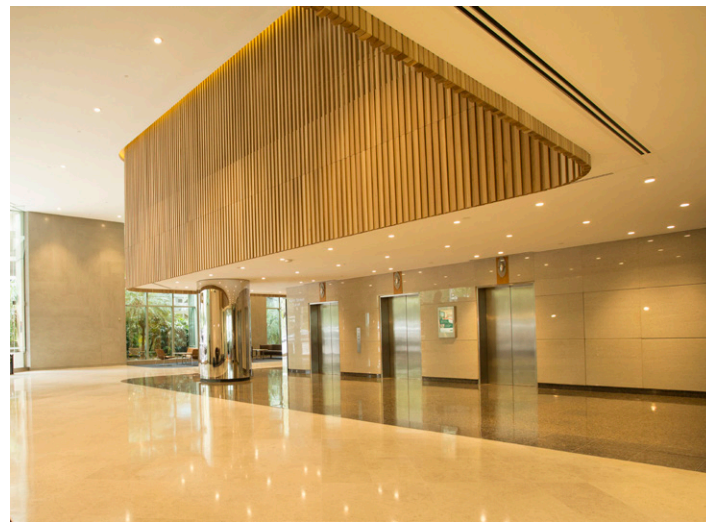

We are licensed to carry out all Phone, Data, ADSL, Cat 6, Cat 6A, Cat 7, Coax, Fibre installations and maintenance. Our services include detailed fault finding and preventative maintenance.

## Smart Metering Solutions

Automated meter management produces invaluable information to help improve operations and business efficiency. Smart metering solutions involve the use of advanced meters and integrated communications systems, they provide the possibility of bi-directional communication between the consumer and the supplier and allow consumers to monitor their consumption and make informed choices.

## Our clients have peace of mind

The safety of your business is our priority. Alland Group provides crucial, regular electrical testing that will alleviate any safety concerns and keep your business compliant.

### Appliance Test & Tagging

Our technicians will assist in the administration of your business' annual maintenance with 'Test & Tagging', from scheduling to reporting.

### Emergency & Exit Lighting Testing

Standards for Emergency & Exit Lighting are always evolving. Alland Group's technicians are accredited through FPAS (Fire Protection Accreditation Scheme) and provide detailed reports for auditing purposes to streamline your workload and provide best practice solutions.

### RCD Testing

RCD testing is an essential requirement for any business, and mandatory in NSW. This life saving protective equipment is a vital device that must be maintained to ensure its operational capabilities.

### Thermographic Scanning

Infrared Thermographic Scanning is a fast and effective way to detect any potential problems in your electrical equipment, before they become serious faults. It is an essential part of electrical equipment maintenance, saving you money by preventing breakdowns and repairs.
