Quality Assurance

We will never compromise quality for price. Our quality assurance guarantee ensures our clients get the best product for their specification.

Our service team are all highly qualified licenced electricians and our service vehicles are fully equipped with materials to meet the needs of most day to day work. Current testing equipment and state of the art software enable rapid response in an emergency situation.

Design and Construction turn-key solutions

Alland Group is proficient in the execution of pre-design or design and build projects. Our extensive experience covers all types of electrical and communications services in diverse projects.

Alland Group offers wide-ranging Service & Maintenance capabilities

Alland Group offers wide-ranging Service & Maintenance capabilities. Our Service team consult extensively with Building Managers to determine maintenance requirements.

Finger Wharf Woolloomooloo

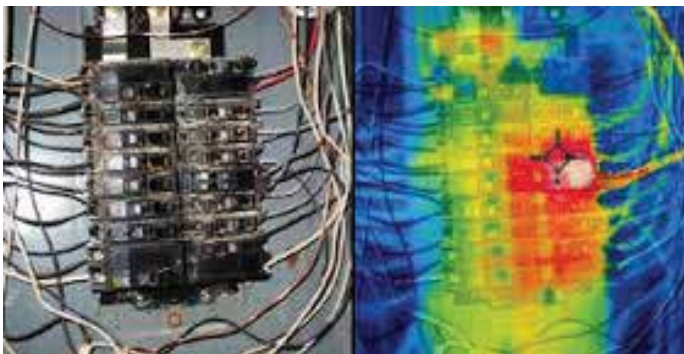

24 hour, 7 days a week emergency service

Alland Group provides our clients with a 24 hour, 7 days a week emergency callout service. Our technicians are always ready to help. **Call 1300 255 263** and leave a message and your call will be returned immediately.

Thermographic Scanning

Infrared Thermographic Scanning is a fast and effective way to detect any potential problems in your electrical equipment, before they become serious faults. It is an essential part of electrical equipment maintenance, saving you money by preventing breakdowns and repairs.

Sustainable Lighting Solutions

Alland Group recognises the need to operate the business in a manner that reflects good environmental management.

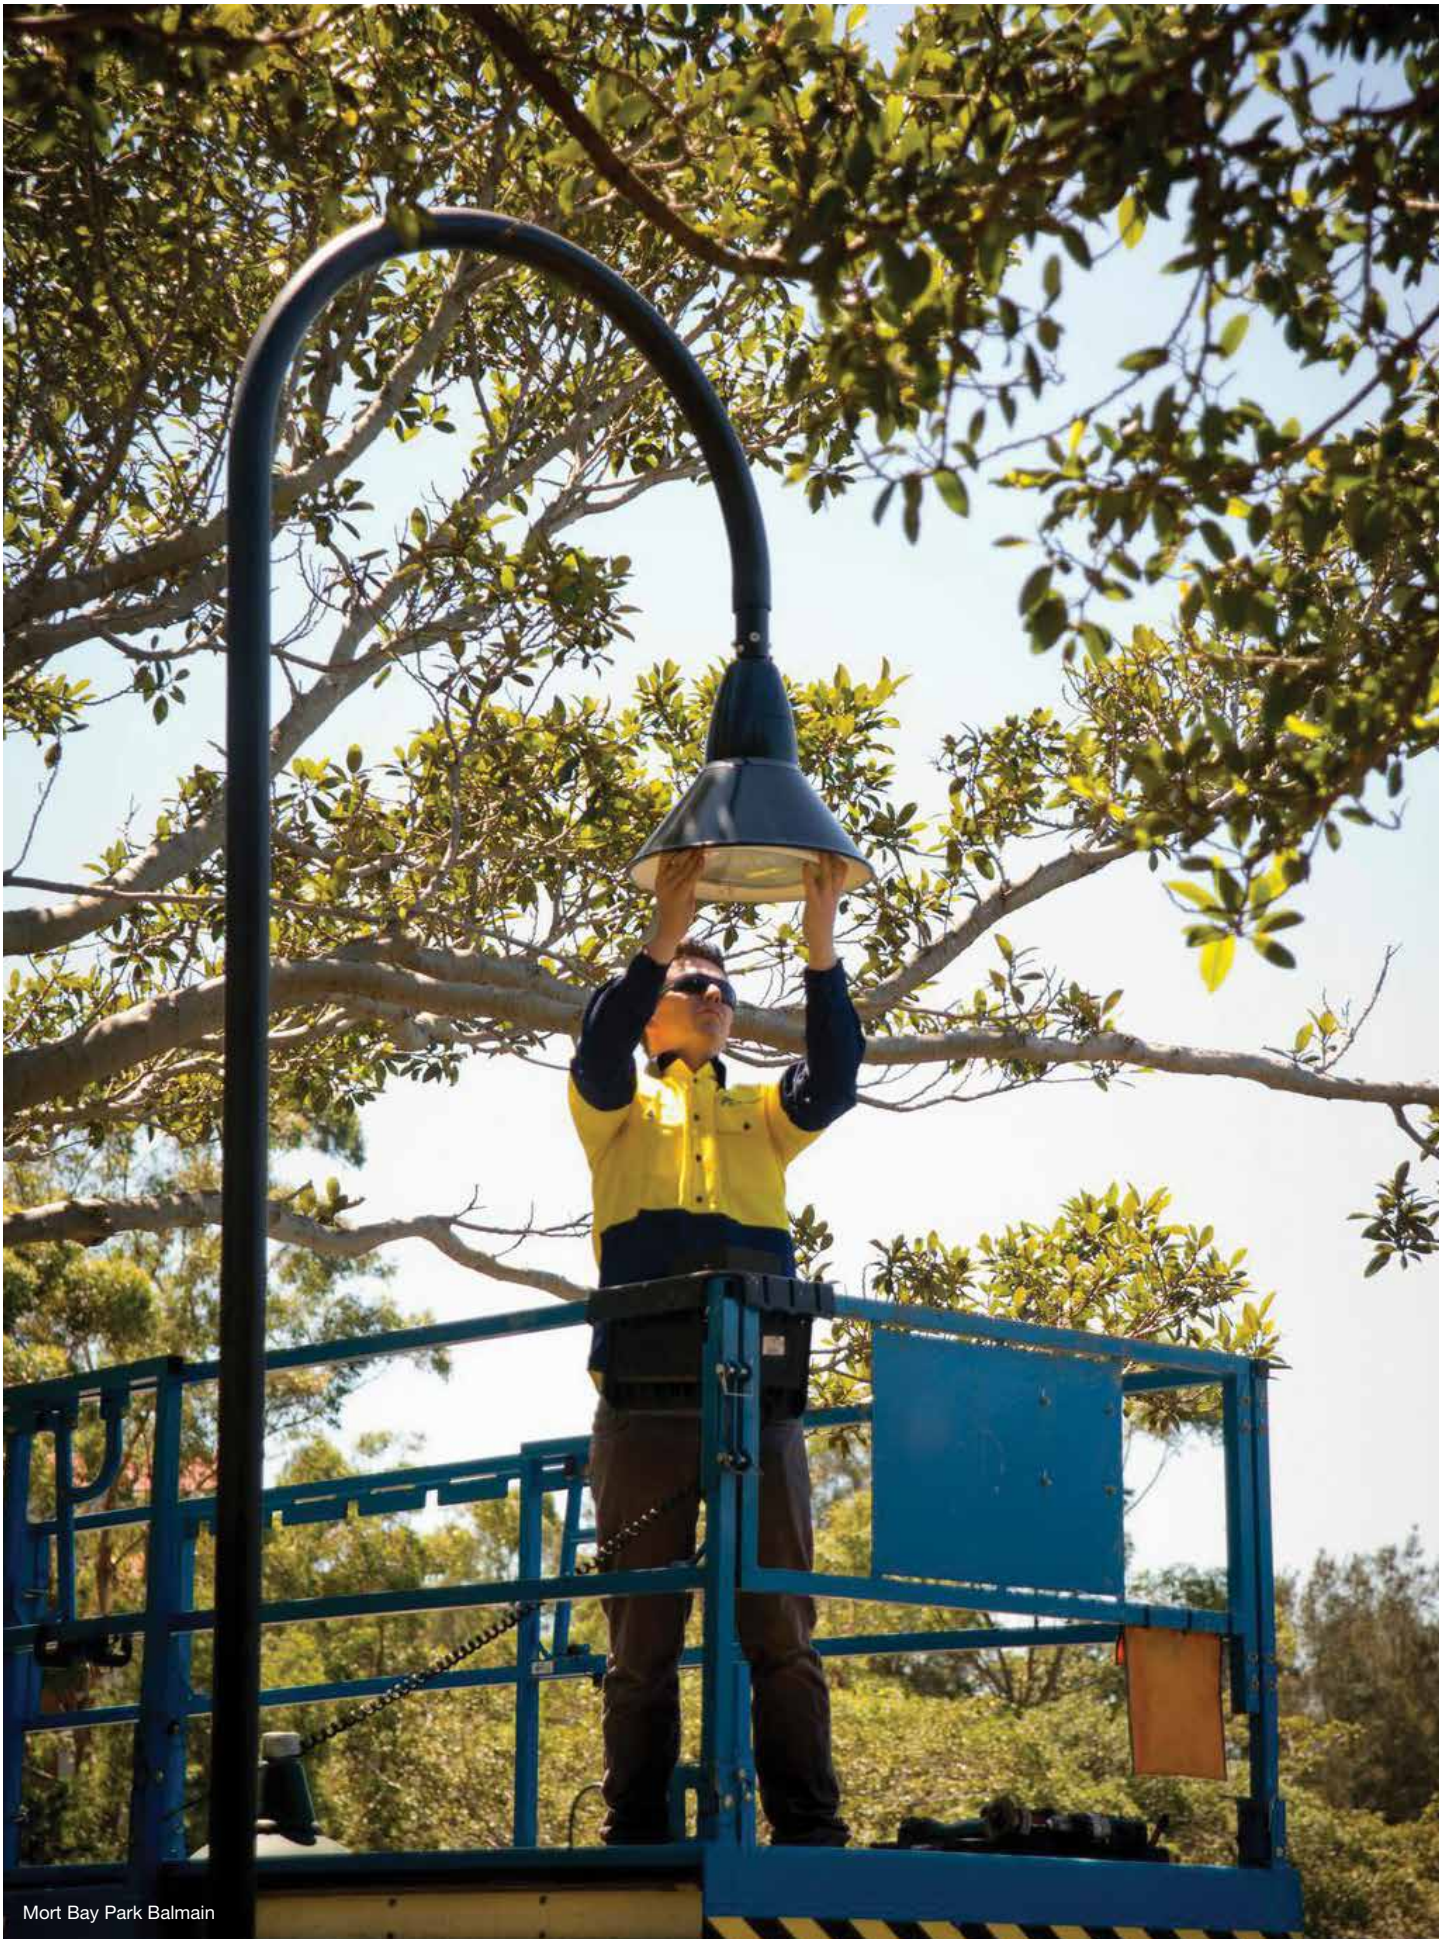

Data and Communications Solutions

Alland Group's highly skilled workforce of data and communications experts can provide you with a futureproof cabling system to meet your data communications system requirements.

We are licensed to carry out all Phone, Data, ADSL, Cat5e, Cat 6, Cat 6A, Cat 7, Coax, Fibre installations and maintenance. Our services include detailed fault finding and preventative maintenance.

Smart Metering Solutions

Automated meter management produces invaluable information to help improve operations and business efficiency. Smart metering solutions involve the use of advanced meters and integrated communications systems, they provide the possibility of bi-directional communication between the consumer and the supplier and allow consumers to monitor their consumption and make informed choices.

Mort Bay Park Balmain

Napier Street Paddington

We provide a 24-hour callout service ensuring **our clients have peace of mind**

Appliance Test & Tagging

Alland Group provides regular Test & Tagging to our clients to ensure compliance with Electrical Safety Standards.

Emergency & Exit Lighting Testing

Alland Group assists our clients to keep up to date and compliant with Emergency & Exit Lighting Standards and provides detailed reports for auditing purposes to streamline your workload and provide best practice solutions.

RCD Testing

A residual current device (RCD) or a residual current circuit breaker (RCCB) commonly known as a safety switch is designed to isolate power when it detects an imbalance

between the active and neutral conductor. Alland Group regularly carries out RCD testing for our clients to ensure compliance with legislation.

Specialist Lighting Control (CBUS & Dynalite)

Alland Group is proficient in the installation and programming of Specialist Lighting control systems. If you're thinking of turning your building into a smart building a Lighting Control system may be just what you need.

Specialist Lighting Control is a management system for Buildings, Hotels and Commercial venues. It is used to control lighting and other electrical services such as Pumps, Audio Visual Devices, Motors, etc. These systems can be used to easily control virtually any type of electrical load.
